The Azerbaijan Armed Forces on March 25 took local control measures to suppress illegal movement of military personnel and arms via the dirt roads bypassing the Lachin highway in the Karabakh economic region.

The Azerbaijani army took control of the unpaved mountain roads in the temporary monitoring zone of the Russian peacekeepers to curtail illegal transfers from Armenia to the Karabakh region.

Taking into account the current situation, necessary local control measures were taken by the Azerbaijan Army Units to suppress the use of dirt roads north of the Lachin road for illegal activities, as well as the aggravation of the situation by the transportation of weapons and ammunition by Armenia and the commitment of potential provocations, Azerbaijan's Defense Ministry said in a statement on March 25.
