Al Jazeera (25 September 2024)

China has said it test-launched an intercontinental ballistic missile (ICBM) into the Pacific Ocean.

The ICBM, carrying a dummy warhead, was launched by the Peoples Liberation Army (PLA) Rocket Force at 8.44am (00:55 GMT) on Wednesday and fell into expected sea areas, the Chinese Ministry of Defence said in a statement.

It added that the launch was a routine arrangement in our annual training plan and not directed at any country or target.
