TRT World (6 November 2025)

NATO deploys the first systems along the borders of Poland and Romania, while Denmark has also decided to acquire the Merops technology.

Poland and Romania are deploying a new weapons system to defend against drones, following a spate of incursions – allegedly from Russia – into NATO airspace in recent months that exposed the alliances vulnerabilities and put Europe on edge.

The Kremlin has repeatedly rejected allegations that Russia was behind unidentified drones that flew over several European capitals.
