Denis Becirovic cautions international community against repeating past failures seen during Bosnian War

The chairman of the Presidency of Bosnia and Herzegovina warned the UN General Assembly on Tuesday that the international community has failed to respond adequately to the genocide committed against Palestinians in Gaza.

Addressing world leaders in New York during the 81st session of the assembly, Denis Becirovic stressed that nations cannot remain passive in the face of widespread injustice, drawing direct parallels between modern conflicts and the atrocities inflicted upon his own country during the 1990s.
